

# TECHNOLOGY!

MR. EMR

to  
the  
rescue

**Grand Marais, MN.**  
**A quaint, little hamlet on**  
**the shores of Lake**  
**Superior.**

# Grand Marais is a nice town.

Its inhabitants are lively and energetic.

Its fish are very big and easy to catch.

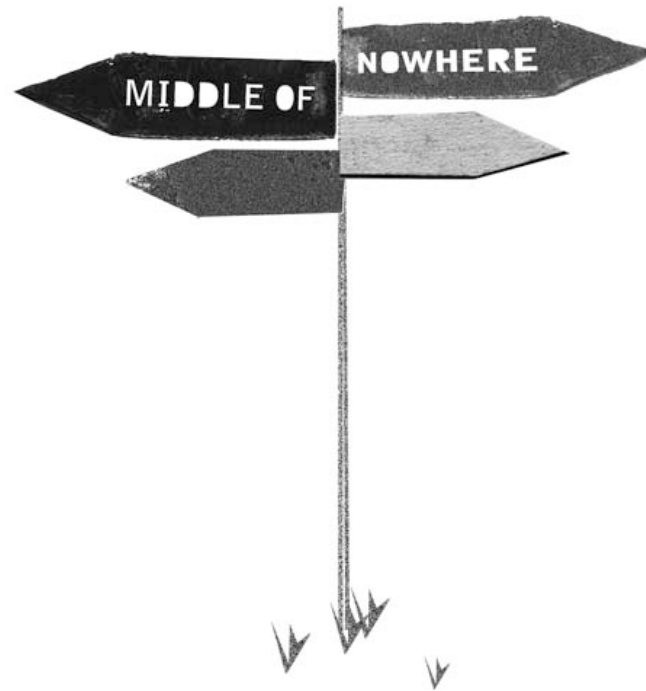

# And its clinic is exceptional.

Welcome to Sawtooth Mountain Clinic!

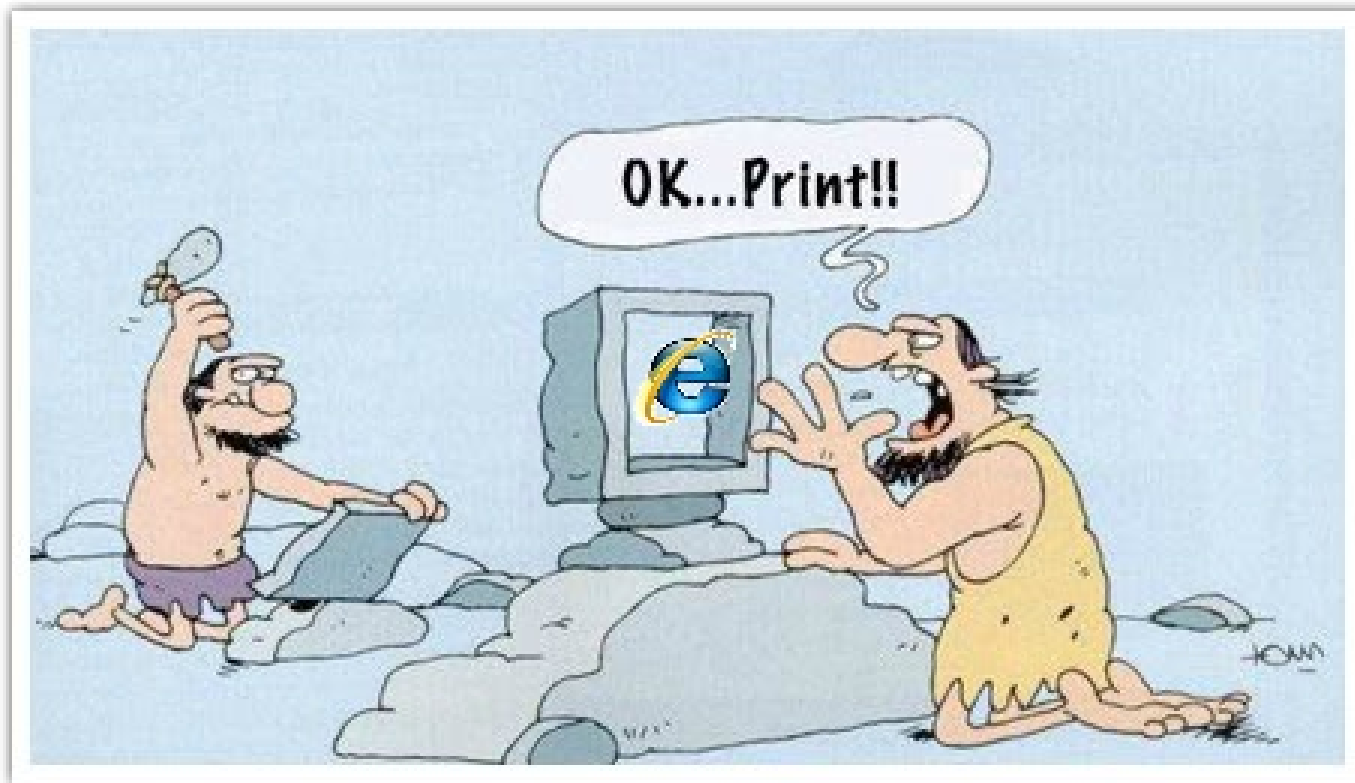

# One problem...

# Actually, two problems...

Lovely people, no doubt...  
but we were practically living  
in the stone age.

# We needed some serious help.

“I’d like to  
see  
the doctor”

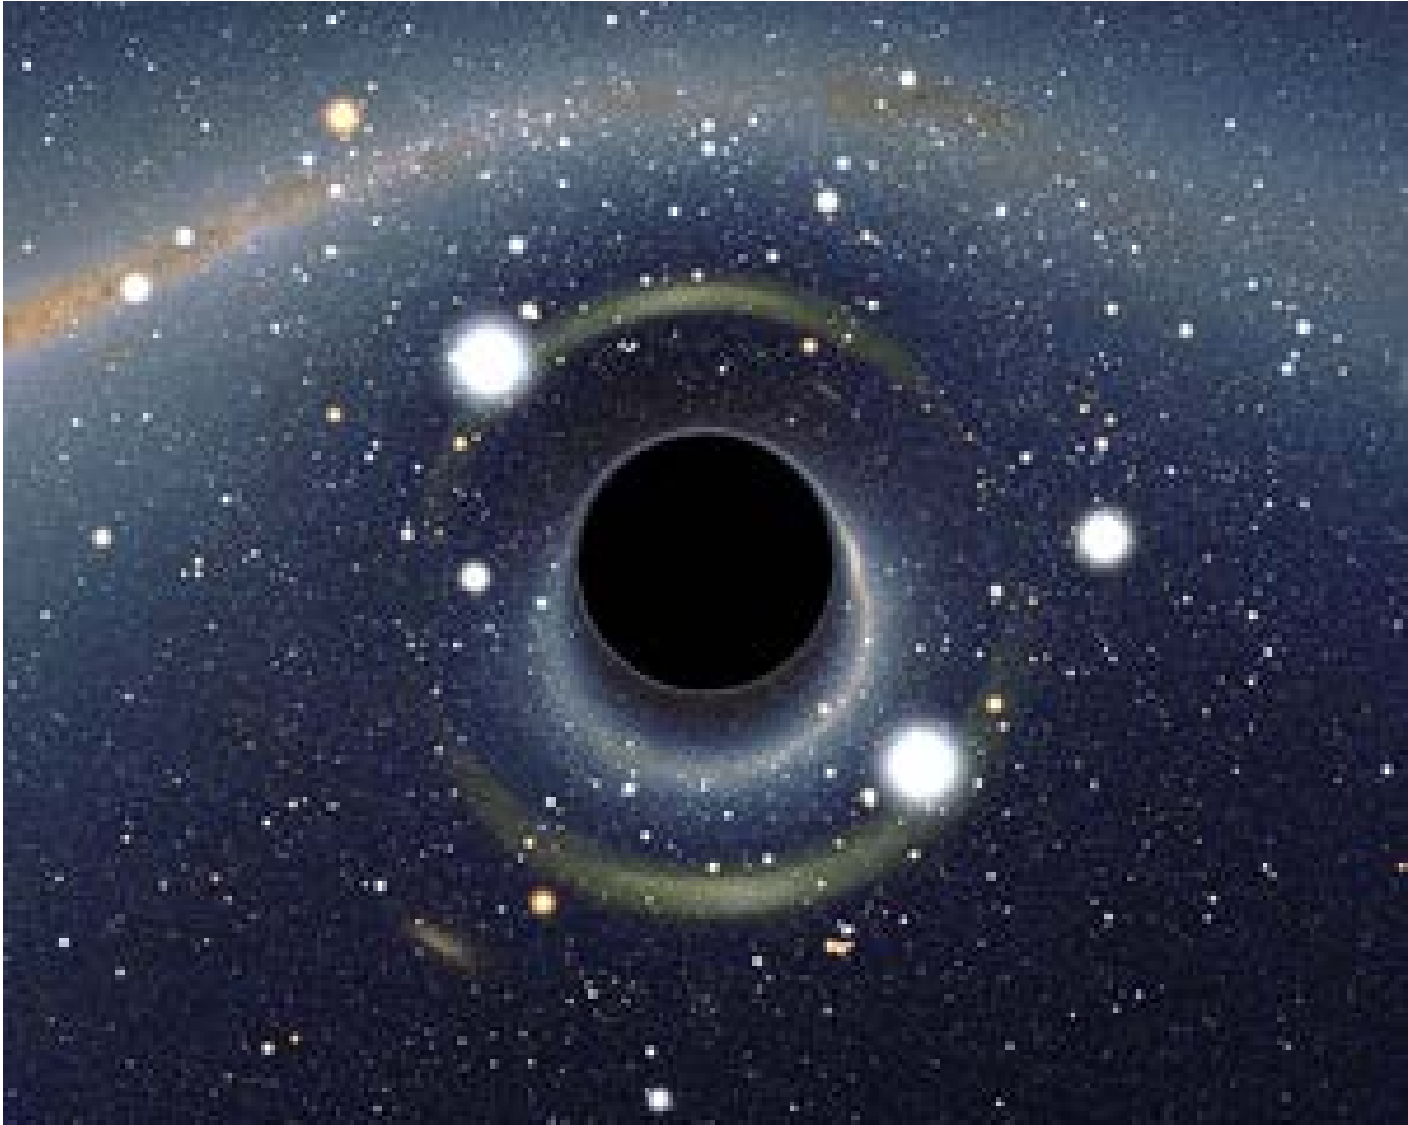

# Community Relations Committee--

This committee functioned as the think tank for our goal of improving care through technology.

# old website

actually, this is a black hole...but its not too far off...

NEW, SNAZZY WEBSITE

This is an incredible community tool that helped people get motivated to MOVE!...

May--12,238.4 Miles (13 times are Lake Superior)

February--4681.63 Miles (and counting)

It was also an excellent “baby step” tool for community members to get familiar with using technology to stay healthy.

**Video topics range from  
tick prevention (ick!)**

**to Palliative Care  
to Local, Healthy Food (yum!)**

MIRC monies  
allowed us to hire  
**PATRICK KNIGHT**  
(VIDEOGRAPHER  
EXTRODINAR)

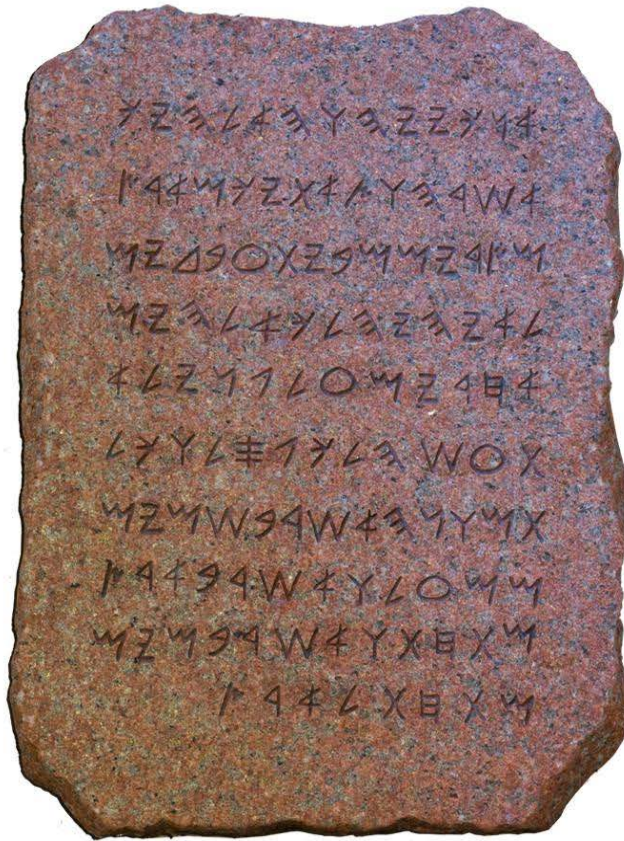

who has been filming and  
editing these incredible  
videos.

these videos allow us to bring our vital health information to a youtube generation who looks to the internet for their info.

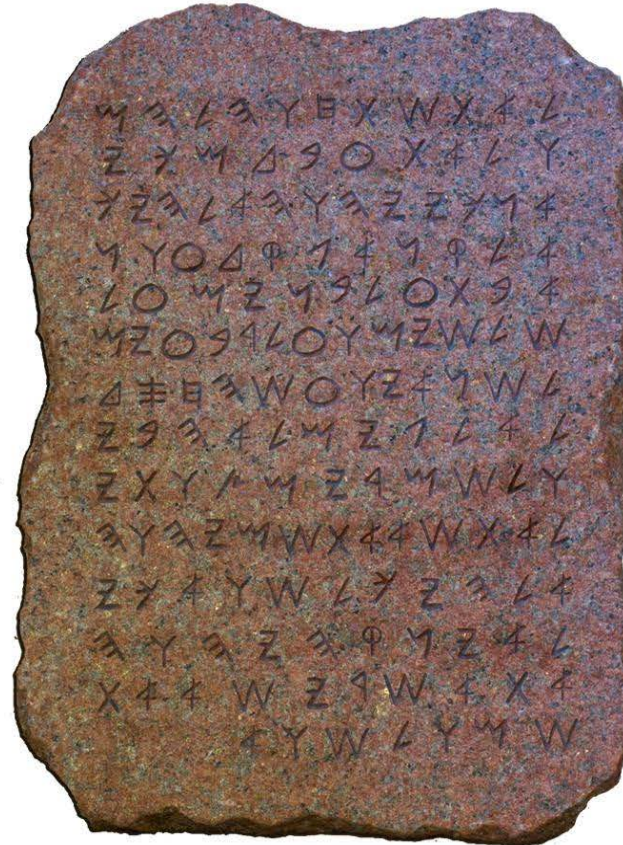

see us becoming culturally and technology relevant?

from this understanding of a tablet

Front

Tablet 1

Back

to this....  
(slightly more useful, yes?)

- 3 IpadS purchased as part of a pilot project
- Goal was to introduce our patients to the idea of entering patient data on a computer.
